Gentlemen:

The Rock Tank Morrow Lower zone in the above captioned well has been closed-in since 1974. The Rock Tank Morrow Upper zone is capable of producing approximately 150 MCFGPD. Plans are made to run a bottom-hole-pressure test on the well. It will be necessary to flare the gas during the test period.

We respectfully request a 60-day permit to flare gas from this well.

Yours very truly,

C. D. BORLAND  
Area Production Manager
