13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent data, including estimated date of starting any proposed work. If well is directionally drilled give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

On 11/22/93, we backed off the worn 4 1/2" casing at 338' and ran 8 jts. of new casing. The casing was cemented to surface with 123 sx class "C" cement via 1" pipe. On 11/29/93, we acid washed the disposal interval (5508' - 5358') with 15% HCl acid. The next day, the zone was acidized with 10,416 gals. 15% HCl acid + 2450 lbs rock salt diverter. Following the acid job, we ran 134 jts. of new 2 3/8" plastic coated tubing and a 4 1/2" Baker AD tension packer. The well was returned to injection on 12/1/93.
