Randall #1-K-21-22-27
Eddy County, New Mexico

Gentlemen:

In response to your notice of 10 October 1972, regarding the required multi-point back-pressure test of the subject well, an exemption from the test requirement is requested.

The No. 1 Randall is a marginal gas well flowing 180 MCFPD and 15 barrels of condensate with a FTP of 900 psi into the Llano line pressure of approximately 800 psi. The well is producing at capacity and is not capable of taking a normal four-point test.

Your favorable consideration of the requested exemption from the multi-point back-pressure test will be appreciated.

Yours very truly,

MORRIS R. ANTWEIL
