7-5: Drag-A Well No. 1--Application to
Dually Complete--Carlsbad, South
(Morrow) and (Atoka) Fields,
Eddy County, New Mexico.

File: W2-Ed-376-72

New Mexico Oil Conservation Commission--2

P. O. Box 2088

Santa Fe, New Mexico 87501

Attention: Mr. A. L. Porter, Jr.
Secretary-Director

Gentlemen:

We respectfully request administrative approval of our application for the conventional dual completion of our Drag-A Well No. 1--located in Unit C, 660' FN and 1980' FW lines, Section 18, T-23-S, R-27-E, Eddy County, New Mexico (Federal Lease No. NMO540701-A) - as a gas well in the Carlsbad, South (Morrow) and (Atoka) Fields. The following data and Forms are included to support this application:

1. The Commission authorized a similar completion by Order No. R-3702--Pennzoil United, Inc.'s Mobil "12" Federal Well No. 1.
2. This is a conventional gas/gas completion with the lower zone - Carlsbad, South (Morrow) to be produced through 2-7/8" O.D. tubing set in a Baker Model F-1 production packer at 11,470', and the upper zone - Carlsbad, South (Atoka) to be produced through the tubing/casing annulus.
3. Form C-107 "Application For Multiple Completion".
4. Diagrammatic sketch of the Multiple Completion with all pertinent information.
5. Lease Plat with Drag-A No. 1 located thereon as well as offset completion and operator information.
6. Copy of letter requesting waivers of objections from offset operators.
7. U.S.G.S. Form 9-331 "Sundry Notices and Reports on Wells" completed as a production packer setting affidavit.
8. Electrical log of well with pertinent formation and completion data marked thereon.

Both zones of this well have been individually potentialized with the proper reports filed with the Artesia office of the U.S.G.S., Department of the Interior. However, a packer leakage test is pending your approval of this dual proposal and subsequent connection. It is understood that final approval of this completion is subject to the completion and submission of such a communication test report.
