Re: Union Mead Com.
#1-H, 8-22-27
Eddy County, N. M.

Gentlemen:

We hereby acknowledge receipt of Form C-103 reporting the remedial work performed on the subject well. According to said report, the Strawn Zone is now producing through the tubing and the Morrow Zone through casing-tubing annulus, by means of a cross-over assembly.

Order R-4474 approved the dual completion of this well (conventional) to produce the Strawn through the casing-tubing annulus and the Morrow through the tubing.

Therefore, you must submit a packer setting report for the additional packer, a diagrammatic sketch of the well, and make application to our Santa Fe Office for an amendment to Order R-4474.

If you have any questions concerning this matter, please feel free to call upon me.

Sincerely yours,

W. A. Gressett
