Eddy County, N. M.

Gentlemen:

We hereby acknowledge receipt of your letter concerning gas oil ratio periods for the Rock Tank Upper Morrow and Rock Tank Lower Morrow Gas Pools.

A gas oil ratio test is not required for gas wells. However, a Multi Point Bank Pressure Test is required within 60 days after (1) the date of the initial connection of a well and (2) the date of reconnection following workover.

Further, Rule 402 requires a Shut-in Pressure Test be taken on all gas wells annually. Said test to be taken during the months of July, August or September and reported to the appropriate District Office of the Commission on Form C-125 not later than October 15th of the same year.

The annual Packer Leakage Test shall be run at the time the Shut-in Pressure Test is taken.

If you have any questions concerning this, please feel free to call upon me.

Sincerely yours,

W. A. Gressett
Supervisor, District II
