Gentlemen:

In compliance with New Mexico Statewide Rule 402, Bottomhole Pressure data is being submitted for two wells that J.M. Huber Corporation operates in the S. Carlsbad (Morrow) Field. When Form C-125 was submitted October 10, 1983, an exception to Rule 402 was requested for several wells including the O'Neill Federal No. 1 and the Terra State No. 1. The wells were shut-in December 8, 1983 while Llano, Inc. (gas purchaser) was exchanging the compressor. The bottomhole pressure data was obtained during the shut-in period.

O'Neill Federal No. 1 - Unit G, Section 23, T-23-S, R-26-E. Test conducted 12/13/83 - 129 hrs. S.I. - 667 psig - 682 psia.

Terra State No. 1 - Unit O, Section 14, T-23-S, R-26-E. Test conducted 12/13/83 - 128 hrs. S.I. - 563 psig - 578 psia.

As other wells that an exception was requested are shut-in, bottomhole pressures will be obtained.

Sincerely,

Robert R. Glenn
District Production Manager
