Re: Union Mead Com #2
N-4-22-27

Dear Mr. Williams:

Concerning the conversation with you on January 31, 1990 regarding the subject well, please find attached a copy of the following:

1. Wellbore diagram before and after the commingling of the Morrow and Wolfcamp instigated by Enron in 1974.
2. Past production from well including decline curves.
3. The latest downhole work reportedly done by Enron in 1974.

As it appears Enron failed to notify the State of the commingling operation they undertook in 1974 any additional information Quinoco may provide is at your disposal.

The well is currently making only 67 Mcf/d of gas. Initial testing of the Morrow in the brief production history it was on would indicate no significant contribution from this zone.

Sincerely,

QUINOCO PETROLEUM, INC.

Dave C. Williams
Drilling & Production Engineer
Western District
