

UNION OIL COMPANY OF CALIFORNIA
 CALVANI COMM NO. 1
 1980' FSL & 2130' FWL
 Sec. 9, T-22-S, R-27-E
 EDDY COUNTY, NEW MEXICO

NOTE: A telephone conversation with W.A. Gressett of NMOCC @ Artesia indicated that filing of a one point test prior to pipeline connection would be acceptable in lieu of a 4-point test. The stabilized flow rate plotted was obtained during well completion cleanup. A 4-point test will be run upon obtaining a pipeline connection.

1 Point - 970 MCFD @ FBHP = 1107 psig
 = 1120.2 psia
 BHP = 4814 psig
 = 4827.2 psia
 $\Delta P = (4827.2)^2 - (1120.2)^2 = 22,047,011.8$
