---NO. 3 B TO FOLD

MESSAGE

DATE July 17, 1973 19

With reference to our conservation this date, please be advised that the bridge plug set in the subject well at 11,540' was retrieved on 3-15-73. The 2-7/8" tubing and packer were then run and set at 8590'. Both sets of Morrow perforations are, therefore, being produced.
