Gas production from the wells in section 23 is currently vented, and gas from the wells in section 26 is sold through a meter at that location. No recent tests are available for either the section 23 or section 26 Sand Dunes (Cherry Canyon) wells. A map is enclosed showing the lease numbers and location of all leases and wells that will contribute production to the proposed commingling facility. All unitized/communitized areas, producing zones/pools are also clearly illustrated.

A schematic diagram (Exhibit 1) is also attached which clearly identifies all equipment that will be utilized.
