Re: Belco Petroleum Corporation  
James Ranch Unit No. 4  
1980' FSL & 660' FWL  
Section 6, T-23-S, R-33-E  
Eddy County, New Mexico

Gentlemen:

1. Existing Roads - Highway 128 is the nearest existing road.
2. Planned Access Roads - It is planned to build a road into the location straight north from Highway 128.
3. Location of Wells - This is the second Belco Petroleum Corporation well in the area, being an east offset to the Belco Petroleum Corporation James Ranch Unit No. 3.
4. Lateral Roads to Well Locations - The roads to the wells are shown on the attached plat.
5. Location of Tank Batteries and Flowlines - In case of production, any tank battery or necessary producing facility would be placed upon the drilling pad.
6. Location and Types of Water Supply - There is no ground water available in the area and water will have to be purchased from a commercial source and trucked to the location.
7. Methods for Handling Waste Disposal - It is planned to build an 8' x 4' x 4' waste pit next to the reserve pit in which to dispose of all waste.
8. Proposed Disposition of Produced Brine Water - Subject well is a gas prospect and no water production is anticipated; however, any produced brine water would be disposed of by hauling to a commercial water disposal well.
9. Disposition of Casinghead Gas - There is a ready market in the area for casinghead gas and the low pressure casinghead gas will be sold.
