Gentlemen:

Enclosed are amended forms covering the completion of HNG Oil Company's Bowden 25 Federal Com. #1 located in Eddy County, New Mexico

Since this well was drilled and completed in 1973, the well was referred to as a Crawford (Morrow) pool well. However, no record can be found that a request was ever made for a new field by this name. The well is actually completed in the Atoka formation, as the enclosed Form C-123 indicates.

After conferring with Mr. Gressett of the New Mexico Oil Conservation Commission, we are resubmitting the enclosed set of forms, as he suggested. Mr. Gressett said that the logs would not be necessary, since he still has copies of the originals.

If any additional information is required, do not hesitate to advise.

Best regards,

HNG OIL COMPANY

  
Tom Pickering
