

±12,900' to ± 15,000' (cont'd) Run 4½" to 5½" full or tapered liner from  
± 12,600' to total depth to accomodate  
possible single or dual completion in  
the Strawn, Atoka, and/or Morrow zones.  
Circulate cement behind entire liner.

(Refer to attached tentatively proposed  
casing schematic.)
