23. PROPOSED CASING AND CEMENTING PROGRAM

SIZE OF HOLE	SIZE OF CASING	WEIGHT PER FOOT	SETTING DEPTH	QUANTITY OF CEMENT
22"	16"	64#	± 600	Circ. to surface
12 1/4"	10 3/4"	40.5#	± 4400	As Required
9 1/2"	7 5/8 L.	26.4 & 29.7	± 12,000	As Required
6 1/2"	5 L.	15.0	± 15,000	As Required

Plan to drill 22" hole using native mud and set 16" surface casing @ + 600', circ. cement to surface. Using controlled brine w/additives as required, drilling 12 1/4" hole to + 4400' and run 10 3/4" casing. Cement as required for satisfactory fillup. Drill 9 1/2" hole w/water to +12,000' into Wolfcamp and set a 7 5/8" liner prior to penetrating the Strawn zone. Cement as required for satisfactory fillup. Drill 6 1/2" hole with water and increase weight as required to drill the Strawn, Atoka, Morrow sections. Run 5" liner and circ. cement. Plan to drill and complete or abandon in accordance with prudent practices or as required by governing regulatory body.

Plan to use double ram adequately rated BOP, Hydril, PVT, separator, adjustable choke and other mechanical equipment as required in anticipation of or as dictated by existing hole conditions.

IN ABOVE SPACE DESCRIBE PROPOSED PROGRAM: If proposal is to deepen or plug back, give data on present productive zone and proposed new productive zone. If proposal is to drill or deepen directionally, give pertinent data on subsurface locations and measured and true vertical depths. Give blowout preventer program, if any.

Instructions

General: This form is designed for submitting proposals to perform certain well operations, as indicated, on all types of lands and leases for appropriate action by either a Federal or a State agency, or both, pursuant to applicable Federal and/or State laws and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 1: If the proposal is to redrill to the same reservoir at a different subsurface location or to a new reservoir, use this form with appropriate notations. Consult applicable State or Federal regulations concerning subsequent work proposals or reports on the well.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 14: Needed only when location of well cannot readily be found by road from the land or lease description. A plat, or plats, separate or on this reverse side, showing the roads to, and the surveyed location of, the well, and any other required information, should be furnished when required by Federal or State agency offices.

Items 15 and 18: If well is to be, or has been directionally drilled, give distances for subsurface location of hole in any present or objective production zone.

Item 22: Consult applicable Federal or State regulations, or appropriate officials, concerning approval of the proposal before operations are started.
