RE: Application for Administrative Approval of Multiple Completion,  
South Carlsbad Field, Eddy County, New Mexico

Gentlemen:

Morris R. Antweil respectfully requests administrative approval of the multiple completion of our No. 1 Saik, located in Section 17-T22S-R27E, as a gas-gas, Strawn-Morrow dual completion. Form C-107, Application for Multiple Completion, accompanied by the required supplemental information, is enclosed.

The Commission has previously authorized a Strawn-Morrow dual completion for the Cities Service Oil Company No. 1 Paslay "A" by Order No. R-4767 within a mile north of the No. 1 Saik. The completion intervals in the offsetting No. 1 Paslay "A" are stratigraphically equivalent to those of the proposed dual in the No. 1 Saik.

In view of the distinctly separate reservoir developments in the Strawn and Morrow formations and the previous approval of a similar multiple completion, Morris R. Antweil requests administrative approval of the multiple completion of the No. 1 Saik. Approval is requested contingent on obtaining and filing the packer leakage test immediately upon the pipeline connection of the well. The packer leakage test was not obtained during potential testing since there were some 30 days between the potentials on the separate intervals.

Respectfully,

MORRIS R. ANTWEIL

\*Should waivers from all offset operators not accompany an application for administrative approval, the New Mexico Oil Conservation Commission will hold the application for a period of twenty (20) days from date of receipt by the Commission's Santa Fe office. If, after said twenty-day period, no protest nor request for hearing is received by the Santa Fe office, the application will then be processed.

NOTE: If the proposed multiple completion will result in an unorthodox well location and/or a non-standard proration unit in one or more of the producing zones, then separate application for approval of the same should be filed simultaneously with this application.
