

Application for Permit to Drill Azotea Mesa Unit "A"
No. 1, Eddy County, New Mexico

October 11, 1973

Page No. 3

8-5/8" surface pipe set at 2500' with cement circulated
to surface.

5-1/2" production casing set at TD 10,800' and cemented
with sufficient volume of cement to cover all zones from
TD through the Strawn zone at approximately 9000'.

In addition to the blow out prevention equipment shown on the attached
plans, a pit volume totalizer and flow line sensor will be installed
prior to drilling out from under the 8-5/8" surface casing.

The well will be drilled in accordance with USGS Deep Well Control
requirements stated in Order 30CFR 221.24, 221.36 and 221.37.

If further information is needed to evaluate this request, please
contact me at the above address.

Yours very truly,

E. Y. Wilder
Region Operations Manager
