

SURFACE USE PLAN

Phillips Petroleum Company, Livingston Ridge Fed Lease, Well No. 9, 1980'
FWL & 990' FSL, Section 1, T-22-S, R-30-E, Eddy County, New Mexico. (Fed
Lease No. NM 0479196)

This plan is to accompany "Application for Permit to Drill" the subject well which is located approximately 28 miles East of Carlsbad, New Mexico. The following is a discussion of pertinent information concerning the possible effect which the proposed drilling well may have on the environment of the well and road sites and surrounding acreage. A copy will be posted on the derrick floor so that all contractors and sub-contractors will be aware of all items of this plan.

1. Existing Roads

- A. 1900' South of location; runs East and West, and 600' West of location. (Re-entry well.)

2. Planned Access Roads

- A. North, from existing road and location 1900', and East from existing road to location.
B. Turnouts:
C. Drainage Design: existing road to have center line to side line slope.
D. Culverts, Cuts and Fills:
E. Surfacing Material:
F. Gates, Cattleguards, Fences: none.
G. Proposed Road: already in place.

3. Locations of Existing wells: 1/4 mile North, West and South.

4. Locations of Tank Batteries, Production Facilities, Production Gathering, and Service Lines: center of West half of Section 1.

5. Water Supply Source: hauled.

6. Source of Construction Materials:

- A. Caliche for surfacing the new road and well pads will be obtained from: none required.

- B. Caliche pit is located on: n/a

7. Methods for Handling Waste Disposal:

Will be put in trash trailer and hauled off to landfill. If well is productive, maintenance waste will be placed in special trash cans and hauled away periodically. All produced water will be collected in tanks until hauled to an approved disposal system, or separate disposal applications will be submitted for appropriate approval.

8. Ancillary Facilities: none.
