Re: Off Lease Sales Gas Meter
State K 4401 No. 1
C NE NW Sec. 2, T-24-S, R-26-E
Eddy County, New Mexico

Dear Mr. Gressett:

Jake L. Hamon is the operator of the above referenced well and also operates the State L 4325 gas well which is a south offset to the referenced well. El Paso takes the gas from both of these wells and is now setting a compressor on the State L 4325 location which is located in the center of NE SW of Section 2, T-24-S, R-26-E.

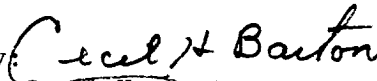

El Paso will move the sales gas meter from the referenced well to the compressor location at the State L 4325. The gas from both wells will continue to be metered separately. No change will be made with the tank batteries. The sales gas meter will be re-located during the first week in May.

This change is being made so that the gas from both wells can be compressed with one compressor.

Please advise if any additional information is requested.

Sincerely yours,

JAKE L. HAMON
