

DEVELOPMENT PLAN FOR SURFACE USE

Tin Henry Federal
Well #1
Eddy County, New Mexico

1. Existing Roads: U.S. Highway "137" and Lincoln National Forest secondary road.
2. Planned Access Road: Lincoln National Forest Road 33 miles West Carlsbad, N. M.
3. Location of Well: 1980' FE & 1980' FS Lines, Sec. 30, T-23-S, R-23-E, Eddy County, New Mexico.
4. Lateral Road to Well Location: Will exit Lincoln Nat'l Forest Road South onto a proposed caliched road 12' x 1500'. Refer plat attached.
5. Tank batteries and flowlines will be located at well site..
6. Water needed for drilling operations will be trucked in and stored in water supply tanks.
7. Waste disposal will be handled through maintaining a day-to-day housekeeping program with a detailed clean up immediately after the well is completed.
8. Produced brine water will be trucked to salt water disposal wells.
9. Inasmuch as our objective is gas, we do not anticipate casinghead gas production. However, in the event casinghead gas is found in commercial quantity, we will then make arrangements for a pipe line and marketing facilities.
10. Location layout plats attached.
11. Upon completion of well, location will be cleaned and leveled with bulldozer and grading equipment and restored to original state as near as feasible.
