

slight loss of pressure; repressured to 3000# with loss of approximately 100# during first eleven minutes then leveling out for remaining one minute of test.

NO VISIBLE LEAK. PRESSURE LEVELING OUT TOWARDS APPROXIMATELY 2900#.

---

TESTING: All inside valves next to stack with pipe rams closed - pressure applied as before.

Test #6 Pressured to 3000# with leak thru inside valve next to stack on kill line.

---

TESTING: Inside valve next to stack on chokeline and outside valve off stack on kill line with pipe rams closed - pressure applied as before.

Test #7 Pressured to 3000# with loss of pressure; repressured to 3000# with leak thru outside valve off stack on kill line. Greased and operated valve.

Test #8 Repeated test. Pressured to 3000# with loss of approximately 100# during first six minutes then leveling out for remaining three minutes of test. Pressure recorder chart ran over-time on this test.

NO VISIBLE LEAK. PRESSURE LEVELING OUT TOWARDS APPROXIMATELY 2900#.

---

START CHART #2

TESTING: Hydril with valves same as before.

Test #9 Pressured to 2000# with loss of pressure; repressured to 2000# with loss of pressure; repressured to 2000# with loss of pressure;
