

NEW MEXICO OIL CONSERVATION COMMISSION

PACKER SETTING REPORT

Adopted
1-1-65

RECEIVED

JUN 16 1975

I, Floyd E. Page, being of lawful age and having J. C. C. ARTESIA, OFFICE
Name of party making report

knowledge of the facts hereinbelow set out do state:

That I am employed by Champlin Petroleum Company in the capacity of
Production Foreman, that on May 12, 1975

I personally supervised the setting of a Baker Mod. "F"
Make & type of packer
in Champlin Petroleum Company, Nix-Yates,
Operator of well *Lease name*

Well no. 1 located in the East Carlsbad, Wolfcamp Gas field,
Eddy county, state of New Mexico, at a subsurface depth of
10,269' feet, said depth measurement having been furnished me by
Welex;

That the purpose of setting this packer was to effect a seal in the annular space between two strings of pipe where the packer was set so as to prevent the commingling, in the bore of this well, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer; that this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.
