

Details of bop test

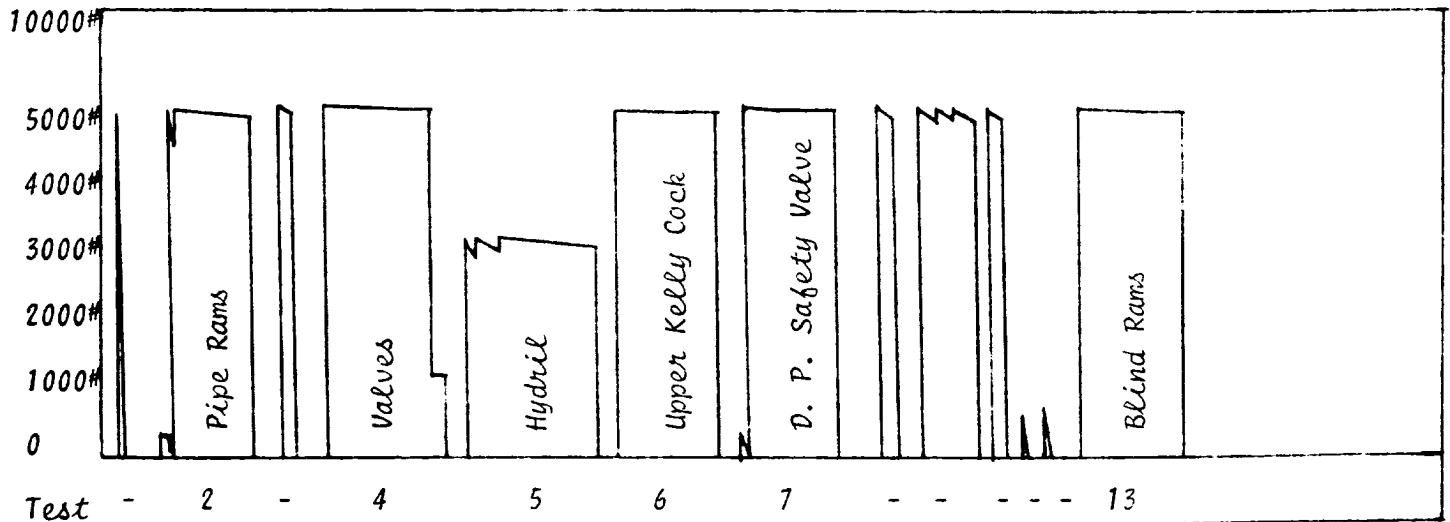

AMOCO Production Company

Teledyne Gas Commission #1

Contractor: Cactus Drlg. Rig 27

Test by Yellow Jacket Tools and Services, Inc.

=====Transposition of the pressure recorder chart=====

The above is a transposition of the pressure recorder chart covering test to the blowout control equipment in service on your well drilling in the Carlsbad Area, Hobbs District, New Mexico. Test was made with test plug landed in casing head with the following test results:

TESTING: Blind Rams with outside valve closed off stack on kill line, outlet valve closed off choke-manifold cross, and wing valves closed off manifold cross - pressure applied thru guage connection.

Test #1 Pressured to 5000# with leak to packing nuts of locking screws on casing spool and leak to threads of flange between chokeline and main inlet valve off choke-manifold cross.

TESTING: Pipe Rams with all outside valves closed off stack - pressure applied down drill pipe.

Test #2 Pressured to 200# and released air; repressured to 5000#
