

Details of bop test

Jake L. Hamon

State 43-25 #1

5/23/74

Contractor: McVay Drlg. Rig 10

Test by Yellow Jacket Tools and Services, Inc.

=====Transposition of the pressure recorder chart=====

The above is a transposition of the pressure recorder chart covering test to the blowout control equipment in service on your well drilling in the Carlsbad, New Mexico Area, Midland District, Texas. Test was made with test plug landed in casing head with the following test results:

Arrived location - rig coming out of hole.

---

TESTING: Blind Rams with outside valve closed off stack on kill line and all valves closed off choke-manifold cross - pressure applied thru guage connection.

Test #1 Pressured to 3500# with loss of pressure; repressured to 3500# with loss of approximately 100# during first fifteen minutes then leveling out for remaining two minutes of test.

NO VISIBLE LEAK. PRESSURE LEVELING OUT TOWARDS APPROXIMATELY 3400#.

---

TESTING: Pipe Rams with all outside valves closed off stack - pressure applied down drill pipe.

Test #2 Pressured to 200# and released air; repressured to 3500# with
