As requested in my telephone conversation of October 19, 1978 with Mr. Mike Williams, Samedan is herein submitting the latest charts and tests on the subject well.

As the charts reflect, there is communication between the Strawn and Morrow zones. Therefore, it is our intent to pull the tubing & pressure test it, inspect packer, dress or replace (depending upon condition), go back in hole and rerun packer leakage test.

Work will commence as quickly as a unit becomes available. Your office shall be notified 24 hours in advance of any work performed.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
