Re: Willow Lake Unit No. 1  
Eddy County, New Mexico

Dear Mr. Knauf:

Enclosed is the final completion report and logs for the Willow Lake Unit No. 1. This form was completed immediately after the completion of the well; however, I decided to hold onto the report until a multipoint back pressure test could be conducted.

During this test an additional 384 MCF was vented to the atmosphere. This is in addition to the 2,000 MCF vented to the atmosphere during the initial attempt to test the Atoka zone.

This test was done on February 23, 1976 and witnessed by Mr. Delton Shirley. All calculations were performed by Garret Computing Service, Dallas, Texas.

Very truly yours,

BURMAH OIL AND GAS COMPANY
