

DEVELOPMENT PLAN FOR SURFACE USE  
ALLIED CHEMICAL FEDERAL  
WELL #1  
Eddy Co., N.M.

1. Existing Roads: New Mexico State Highway "62".
2. Planned Access Road: N.M. Highway "62", 5-1/2 miles NW of White City, N. M.
3. Location of Well: 1980' FNL and <sup>900</sup>~~810~~' FWL, Section 4, T-24-S, R-26-E, Eddy County, New Mexico.
4. Lateral Road to Well Location: Will exit N.M. Highway "62" onto a proposed 12' x 750' caliche road to well location.
5. Tank batteries and flowlines will be located at well site.
6. Water needed for drilling operations will be trucked in and stored in water supply tanks.
7. Waste disposal will be handled through maintaining a day-to-day housekeeping program with a detailed clean-up immediately after the well is completed.
8. Produced brine water will be trucked to salt water disposal wells.
9. Inasmuch as our objective is gas, we do not anticipate casinghead gas production. However, in the event casinghead gas is found in commercial quantity, we will then make arrangements for a pipeline and marketing facilities.
10. Location layout plats attached.
11. Upon completion of well, location will be cleaned and leveled with bulldozer and grading equipment and restored to original state as near as feasible.
