C-125 GWSI

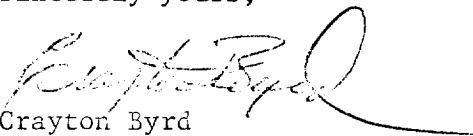

Gentlemen:

Bottom hole pressure testing for the referenced well is required during the month of June, 1978. A steady decline in tubing pressure and high water production of 60 - 70 barrels/day makes us fearful of damaging this Morrow formation during shut-in.

For these reasons we respectfully request exemption from the requirements of the form C-124 and C-125 for this well.

Your consideration in this matter is appreciated.

Sincerely yours,

Crayton Byrd
Production Accountant
