

Adopted  
1-1-65

NEW MEXICO OIL CONSERVATION COMMISSION  
PACKER SETTING REPORT

RECEIVED

MAY 28 1976

I, Michael P. Houston ✓, being of lawful age and having full  
Name of party making report

**E. C. C.**  
**ARTESIA, OFFICE**

knowledge of the facts hereinbelow set out do state:

That I am employed by Mesa Petroleum Co. in the capacity of

Division Engineer, that on March 20, 19 76

I personally supervised the setting of a TIW type SS permanent packer  
Make & type of packer

in Mesa Petroleum Co., Nash Unit,  
Operator of well Lease name

Well no. 2 located in the Nash Draw (Morrow) field,

Eddy county, state of New Mexico, at a subsurface depth of

13,340' feet, said depth measurement having been furnished me by

Schlumberger Well Service;

That the purpose of setting this packer was to effect a seal in the annular space between two strings of pipe where the packer was set so as to prevent the commingling, in the bore of this well, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer; that this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.

Michael P. Houston
