Re: Nash Unit #2-F  
Sec 18, T23S, R30E  
Eddy County, New Mexico

Gentlemen:

Enclosed is Form C-123 requesting creation of the Nash Draw (Atoka) pool. Also enclosed are Forms C-102 and the packer setting report for the subject well. A packer leakage test has not been run. Plans are to run the packer leakage test during the first week in June, in conjunction with multi-point back pressure tests on both zones.

During the past week, the Morrow and Atoka zones have been cleaning up and stabilizing. There has been no indication of communication. Shut in tubing pressure was 5900 psi and 4300 psi on the Atoka and Morrow zones respectively.

Sincerely,

A handwritten signature in cursive script that reads 'Michael P. Houston'.
