20-30 Day Test Following Completion

RECEIVED

FEB 9 1977

Operator assigned an allowable greater than the amount of oil produced on the official test.

For a 25 percent test, each well shall be produced at a rate not exceeding the top unit allowable for the pool in which well is located 1/2 more than 25 percent. Operator is encouraged to take advantage of this 25 percent tolerance in order that well can be assigned increased allowables when authorized by the Commission.

Gas volumes must be reported in MCF measured at a pressure base of 15.025 psia and a temperature of 60° F. Specific gravity base will be 0.60.

Report casing pressure in lieu of tubing pressure for any well producing through casing.

Well original and one copy of this report to the district office of the New Mexico Oil Conservation Commission in accordance with Rule 11.1 and appropriate pool rules.

I hereby certify that the above information is true and complete to the best of my knowledge and belief.
