13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recomple in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

Note: This well has not been used in over 1 year. Gruy Petroleum does not want to P&A this well. A feasibility study is underway and this well will be a big asset for future water disposal. Gruy Petroleum is requesting to temporarily abandon this well at this time. There is already a packer set 82' above the perfs on 2-7/8" internally coated tubg and the annulus is loaded with fresh water and chemical. We plan to run a casing integrity test after receiving approval to TA.
