Re: Terra State
#3-15-23S-26E
1096' FSL 1554' FWL
Terra State
#5-15-23S-26E
1650' FNL 990' FEL

Gentlemen:

A recent inspection of the subject well has revealed that the P&A marker on the Terra State #3 reads 1544 FWL and has no township or range. The Terra State #5 reads 99' FSL and also had no township or range on it.

Rule 202 states every P&A marker must have the name and number of the well and its location (unit letter, section, township, and range). Please see that these markers are corrected.

Sincerely yours,

Mike Stubblefield
Oil & Gas Inspector
