17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.		

It is proposed to change the surface casing size from 8-5/8" to 40.5#, 10-3/4" and set at the same depth of 350 feet in a 15" hole. The casing will be cemented with 350 sacks of 2% CaCl₂ type C cement sufficient to circulate to the surface. After nipping up and testing, a 7-7/8" hole will be drilled to total depth.

The purpose of the larger surface casing is to allow an intermediate string of casing to be set and the hole deepened at a later date in the event the Cherry Canyon is not productive.
