Re: Featherstone McCoy #2  
Ut. A 22-23-26

Gentlemen,

Please find attached a copy of letter we received indicating that the subject well location was ready for inspection.

On February 10, 1987 this location was inspected by our field representative and he found the deadmen to be uncut.

This work needs to be done before final approval can be made on cleanup of location.

Please notify this office when the work has been completed.

Betty Rollins
