Re: Cerro Com #1 - E
Section 11, T23S,
R27E, Eddy County,
New Mexico

Dear Mr. Gressett:

The above referenced well is currently completed in the Morrow formation and a Multi-Point Back Pressure Test was due March 3, 1979. This well went on production on January 3, 1979 at a rate of 288,000 CFPD and has consistently declined to a rate of approximately 57,600 CFPD (See attached production record). It is our plan at this point to plug back and attempt completion in the Wolfcamp. The AFE for this work is currently being circulated among the interested parties and we hope to do this work in the very near future.

We hereby respectfully request that an exemption be granted concerning the Multi-Point Back Pressure Test in the Morrow foundation.

Very truly yours,

BLACK RIVER CORPORATION
