ATTN: Mr. Mike Williams

Mr. Williams

Lanexco, Inc. respectfully requests approval to flare the gas from the above referenced well.

We are currently trying to obtain a gas contract, but still haven't received one yet. If approved we will be flaring approximately 38 MCF per day.

The well is still shut-in, awaiting completion of electrical facilities. It is possible that we might have electricity turned on by the middle part of next week. The completion reports should follow this letter, and I will be in contact with you on the packer leak-off test. The delays in getting this well pumping have been due to all the rain, and paperwork with SPS.

If I can be of further assistance, please contact me.

Sincerely,

Mike Copeland
Mike Copeland,
Production Supt.
