Dear Bill:

Attached please find a lab report of cement blends run by Halliburton in Midland. I asked Halliburton to recommend a cement job for our upcoming Carrasco #1 we plan to drill.

With these additives in Trinity Lite Wate, we can keep the slurry weight down and still gain a good compressive strength in 24 hours.

I asked Halliburton to run several types of cement through pilot tests, and this was their best results.

I will be in contact with your office before moving a rig.

Yours truly,

J. E. Brusenhan
