

MULTI-POINT SURFACE USE AND OPERATIONS PLAN

Big Eddy Unit #77

1650' FSL, 1980' FWL

Sec. 9 T-22S, R-28E

Eddy County, New Mexico

This plan is submitted with the Application for Permit to Drill the above described well. The purpose of the plan is to describe the location of the proposed well, the proposed construction, activities, and operations plan, the magnitude of necessary surface disturbance involved, and the procedures to rehabilitate the surface after completion of operations so that an appraisal can be made on environmental effects.

1. Existing roads including location of exit from main highway Exhibit "A" is a map showing existing road. This road is obtained by travelling approximately 2½ miles NE of Carlsbad and turning right at the Sheriffs' Posse Roping Arena. The existing road to the planned location is approximately 5½ miles down this road.
2. Planned access road Exhibit "A" & "B" are drawings of existing roads. The existing roads will be improved with watered & compacted caliche. The planned access road will be 12' wide by approximately 500' long. It will be constructed of watered and compacted caliche. There will be turnouts every 2000'. There are no gates, cattle guards or culverts anticipated.
3. Location of existing wells Exhibit "A" shows existing surrounding wells.
4. Location of tank battery and flow lines If a commercial well is obtained, production facilities will be located on the well pad. Refer to exhibit "C".
