

MULTI-POINT SURFACE USE AND OPERATIONS PLAN

BIG EDDY Unit #71

1980' FWL, 1980' FNL

Sec. 7, T-22S, R29E

Eddy County, New Mexico

RECEIVED
SEP 4 1979
U.S. GEOLOGICAL SURVEY
ARTESIA, NEW MEXICO

This plan is submitted with the Application for Permit to Drill the above described well. The purpose of the plan is to describe the location of the proposed well, the proposed construction, activities, and operations plan, the magnitude of necessary surface disturbance involved, and the procedures to rehabilitate the surface after completion of operations so that an appraisal can be made on environmental effects.

1. Existing roads including location of exit from main highway Exhibit "A" is a portion of a map showing existing road. This road is obtained by travelling approximately 2½ miles NE of Carlsbad and turning right at the Sheriffs' Posse Roping Arena. The planned access road is approximately 8 miles down this road.
2. Planned access road Exhibit "A" & "B" are drawings of existing roads. The planned access road will be connected to the water line road. The access road will be approximately 4500' long and 12' wide. It will be constructed of watered and compacted caliche. There are no gates, cattleguards or culverts anticipated. There will be turnouts every 2000'.
3. Location of existing wells Exhibit "A" shows surrounding existing wells.
4. Location of tank battery and flow lines If a commercial well is obtained, production facilities will be located on the well pad. Refer to Exhibit "C".
