Re-entry of Maralo Inc. - State HK Com #1:

P&A on 9-07-89

10-23-00 Application to re-enter the wellbore was approved by the Artesia NMOCD. Moved in a backhoe and dug out the cellar. The 9<sup>5</sup>/<sub>8</sub>" casing was orange-peeled and welded to the 5<sup>1</sup>/<sub>2</sub>" casing. The dry hole marker was welded to a section of 5<sup>1</sup>/<sub>2</sub>" casing set in the slips. There were no casing risers available to bleed off any casing pressure.

10-24-00 Tried to chisel cement out of annulus between 5<sup>1</sup>/<sub>2</sub>" and 9<sup>5</sup>/<sub>8</sub>" casing. Latched onto the dry hole marker with the backhoe and tried to break it free from the slips. Unable to release casing. It appears that some or all of the 5<sup>1</sup>/<sub>2</sub>" casing was left in the well above the cut-off point.

10-25-00 Rigged down equipment and cleaned location. Please cancel application to re-enter wellbore.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
