

removed. Pits will be filled and the location will be cleaned of all trash and junk to leave the well site in an as aesthetically pleasing condition as possible.

- B. Any unguarded pits containing fluids will be fenced until they are filled.
- C. After abandonment, all equipment, trash and junk will be removed and the well site will be cleaned. Any special rehabilitation and/or special revegetation requirements of the surface management agency will be complied with and accomplished as expeditiously as possible.

#### 11. OTHER INFORMATION:

- A. Topography: This area is an area of steep hills and deep draws or canyons with well locations and access roads best located in the draws or on the ridges. Topography is shown on Attachments "A-1" and "A-2". Drainage is to the east by way of Robinia Draw.
- B. Soil: Soils are composed of fine, silt loams and silty, clay loams, which, on the ridges, are overlain with limestone cobbles and gravels.
- C. Flora and Fauna: The vegetative cover is sparse and consists of juniper, yucca, catclaw, weeds and range grasses. Wildlife in the area is that typical of semi-arid desert land and includes coyotes, rabbits, rodents, reptiles, dove and quail.
- D. Ponds and Streams: There are no rivers streams, lakes or ponds in the area.
- E. Residences and Other Structures: There are no occupied dwellings within two miles of the proposed well site. The nearest windmill is approximately one mile northeast.
- F. Archaeological, Historical and Other Cultural Sites: None observed in the area.
- G. Land Use: Grazing and hunting in season.
- H. Surface Ownership: Federal.
