

4. LOCATION OF EXISTING AND/OR PROPOSED FACILITIES: ( AMENDMENT )

- A. Amendment of the original Surface Use Plan is needed to permit InterNorth, Inc. to construct a gas sales pipeline from InterNorth's well No. 1 Azotea Mesa to El Paso Natural Gas Company's existing gas pipeline, as shown on the attached plat. Construction of the gas line would allow production from this well to commence.

The proposed pipeline would be 2-7/8" O.D. It would start at the gas production unit, located on the well pad 100 feet east of the well, and would extend 664 feet in an easterly direction to El Paso's line.

Except for a short distance on the east side of the well pad, the pipeline will not be buried, but will be laid on the ground on the south side and alongside the existing access road. A short portion of the pipeline, where it comes off the well pad, will be covered as a safety precaution as discussed with the Bureau of Land Management.

The route of the proposed pipeline has already been archaeologically cleared.

13. CERTIFICATION:

I hereby certify that I, or persons under my direct supervision, have inspected the proposed drill site and access route; that I am familiar with the conditions that presently exist; that the statements made in this plan are, to the best of my knowledge, true and correct; and, that the work associated with the operations proposed herein will be performed by InterNorth, Inc. and its contractors and sub-contractors in conformity with this plan and the terms and conditions under which it is approved.
