RE: Bird Com No. 1
Eddy Co., New Mexico

Dear Sirs:

This is to update your file on the status of the subject well. At the present time the well is shut in while awaiting results from SEM Photography work being performed by Dowell. This analysis is being performed in an attempt to ascertain the cause of a severe skin damage problem which has occurred in this well. Upon receiving the results of this study, a decision will be made to either (1) re-stimulate the present interval or (2) attempt completion in shallower intervals.

The results of the SEM work is expected on approximately January 20, 1982, according to Dowell personnel. Please advise if further information is needed at this time.

Sincerely yours,

J. T. Lent
Area Production Engineer

JTL/tjw
