

- B. Any unguarded pits containing fluids will be fenced until they are filled.
- C. After abandonment, all equipment, trash and junk will be removed and the location cleaned. Any special rehabilitation and/or special revegetation requirements of the surface management agency will be complied with and accomplished as expeditiously as possible.

11. OTHER INFORMATION:

- A. Topography: The drillsite is located in a relatively level area. Regionally, the slope is to the southwest toward the Pecos River.
- B. Soil: The top soil at the drillsite is sandy loam.
- C. Flora and Fauna: Vacinity surrounding the drillsite is semi-arid desert rangeland. Vegetation is sparse with desert shrubs interspersed with a small amount of native grasses. No wildlife was observed, but wildlife in this habitat consists mostly of lizards, rabbits, rodents, skunks, coyotes, dove and quail.
- D. Ponds and Streams: The Pecos River is about one mile to the southwest.
- E. Residences and Other Structures: Nearest occupied dwelling is approximately 1½ miles to the west. There are no water wells within ½ mile of the drillsite.
- F. Archaeological, Historical and Other Cultural Sites: None were observed in the 400' x 450' area. An archaeological investigation was made by the NMAS on August 26, 1980.
- G. Land Use: Grazing and occasional hunting.

12. OPERATOR'S REPRESENTATIVE:

Representative responsible for assuring compliance with the approved Surface Use Plan:

Mr. Leroy Collins
Field Foreman
905 West Avenue F
Lovington, N. M. 88260
505-396-2613, Office
505-396-5251, Home

Mr. A. L. Crain
Drilling Manager
P. O. Drawer 2960
Midland, Texas 79702
915-682-6271, Office
915-694-6192, Home
