RE: Annual Gas Well Shut-in Pressure Test, 1992  
NEL Com 1 I 9 23S 28E

Gentlemen:

Pogo Producing Company will soon schedule Annual Gas Well Shut-in Pressure Tests for 1992. The referenced well is a marginal low pressure well and will soon require a gas compressor to produce into the gas sales lines. Each time this well is shut-in it requires swabbing fluid from the well to restart production. Gas production volumes decrease considerable after each shut-in period.

We request the subject well be exempted from the annual shut-in test. Your consideration is certainly appreciated.

Sincerely,

POGO PRODUCING COMPANY

Richard L. Wright  
Division Operations Supervisor

RLW/klk
