Multi-Point Surface L and Operations Plan Cities Service Company's Federal "N" No. 1

Page 4

11. Other Information - Continued

- B. Soil: Areas of some relief are mantled by weathered, angular limestone cobbles and gravels. Soils are silty clay loams.
- C. Flora and Fauna: The vegetative cover is generally sparse consisting of mesquite, yucca, shinnery oak, sandsage and perennial native range grasses. Wildlife in the area is also sparse consisting of coyotes, rabbits, rodents, reptiles, dove and quail.
- D. Ponds and Streams: There are no rivers, streams, lakes or ponds in the area. However, the area is tributary to "Dark Canyon" that serves as drainage for a large geographical segment in times of heavy rains.
- E. Residences and Other Structures: None in immediate area.
- F. Archaeological, Historical and Cultural Sites: None observed in the area. Dr. J. Loring Haskell has been engaged to make an Archaeological Reconnaissance of the work area and access road.
- G. Land Use: Cattle ranching and hunting in season.
- H. Surface Ownership: The wellsite and access road are all on Federal surface administered by the Bureau of Land Management.
