

9. WELL SITE LAYOUT:

- A. Exhibit "C" shows the relative location and dimensions of the well pad, mud pits, reserve pit, and trash pit, and the location of major rig components.
- B. A cut of three to four feet will be necessary in the area of the southwest corner of the well pad with a lesser amount of fill in the northwest and northeast areas of the well pad. Clearing and leveling of the well site will be required.
- C. The pad and pit area has been staked and flagged.

10. PLANS FOR RESTORATION OF THE SURFACE:

- A. After completion of drilling and/or completion operations, all equipment and other material not needed for operations will be removed. Pits will be filled and the location will be cleaned of all trash and junk to leave the well site in an as aesthetically pleasing condition as possible.
- B. Any unguarded pits containing fluids will be fenced until they are filled.
- C. After abandonment, all equipment, trash and junk will be removed and the well site will be cleaned. The surface owner's surface restoration requirements will be complied with and accomplished as expeditiously as possible. The surface owner's restoration requirements are set out in the attached letter.

11. OTHER INFORMATION:

- A. Topography: Land surface in the area is level to gently rolling with regional drainage to the east toward the Pecos River.
- B. Soil: Top soil in the area is a sandy loam.
- C. Flora and Fauna: The vegetative cover is sparse and consists of mesquite, creosote bush, weeds, and range grasses. Wildlife in the area is that typical of semi-arid desert land and includes coyotes, rabbits, rodents, reptiles, dove and quail.
- D. Ponds and Streams: Willow Lake is approximately 0.6 mile northeast of the proposed well site. The Pecos River is approximately 4 miles southeast.
- E. Residences and Other Structures: There is no occupied dwelling or windmill within one mile of the proposed well site.
