Gentlemen:

In response to your captioned well status inquiry of February 18, 1975, we wish to advise that we continue to operate and produce this well from the Morrow zone in the Malaga-Morrow Pool. Production for January, 1975, as reported on Form C-115, was 4,792 Mcf of gas.

Please place in suspense our Forms C-101, 102, and 103 wherein we propose to abandon the Morrow zone and test the Delaware oil zone of this well bore. This work has been deferred until Morrow production declines to uneconomical status.

Very truly yours,

T. Harold McLemore  
Phillips Petroleum Company
