

February 19, 1982

El Paso Natural Gas is working on an emergency tie for us into their line, which should be ready no later than Sunday, when we will attempt to blow the well down into their line. We feel this will eliminate a fire hazard, be much safer, and will prevent wasting so much gas. To that end, enclosed is a form, C-104, requesting formal permission to tie into the El Paso line. We do not know how long it will be until everyone feels we can safely again attempt to kill the gas flow, but we will constantly monitor it and will certainly keep your office posted of any changes.

Once again, we apologize for any inconvenience we have caused, we do appreciate the help and understanding on your part in this emergency. If you have further questions, please call and I shall attempt to give you satisfactory answers.

Sincerely,

DINERO OPERATING COMPANY
